What were the Fund's costs for the last year?

(based on a hypothetical \$10,000 investment)

Class	Costs of a \$10,000 Investment	Costs Paid as a Percentage of a \$10,000 Investment
Class A	\$167	1.60%

How did the Fund perform during the reporting period?

For the 12-month period ending June 30, 2025, the DGI Balanced Fund Class A Shares achieved a return of 8.55%. In comparison, its broad-based benchmarks, the S&P 500® Index and the Bloomberg® U.S. Aggregate Bond Index, returned 15.16% and 6.08%, respectively. The Fund's blended performance benchmark returned 10.72%. The primary driver of performance was equity investments, bolstered by favorable market conditions and improving investor sentiment. However, exposure to the U.S. small-cap sector detracted from returns underperforming during the period. Fixed-income holdings contributed positively, albeit to a lesser extent, reflecting a more stable interest rate environment.

The Fund continues to adhere to a balanced strategy, aiming to capitalize on long-term equity growth while managing volatility through fixed-income securities. It is reducing its holdings of shares in Puerto Rico domiciled companies and is methodically diversifying its fixed-income portfolio by purchasing securities directly issued by the U.S. Treasury. The Adviser maintains a constructive outlook, grounded in the belief that a diversified approach is essential to preserving and enhancing the real value of investments over time.

How has the Fund performed since inception?

The Fund's past performance is not a good predictor of how the Fund will perform in the future.
